

Proposed Solution

Introduce a map-based delivery tracking experience that provides customers with the delivery partner's approximate location and dynamically updated ETA during the "Out for Delivery" stage.

Future State Process Flow

Expected Benefits

1. Improved visibility into delivery progress.
2. Reduced customer uncertainty during the delivery window.
3. Better understanding of actual delivery progress and ETA.
4. Improved transparency and overall customer experience.
5. Potential reduction in delivery-status-related support queries.
